

Branded SIP softphone

Duxoft SIP Softphone is innovating software solution designed for PC-to-Phone and PC-to-PC voip services. Duxoft SIP softphone is used by many Voip Service Providers all over the world.

»» With Duxoft SIP Softphone you will have:

Your own brand strengthening and promotion

Your own title, logo and company name is available on the softphone.

Differentiation from your competitors

You can choose any of available skins or even have totally new look of the softphone.

Integration with your CDR system

Softphone automatically opens your web-site for displaying calls history, rates sheet and other information.

Integration with your billing system

Softphone displays balance and remaining credit time.

Local market penetration

Multilanguage interface allows you to provide your service both in local market and all over the world.

Additional marketing opportunities

Displaying embedded flash advertisement will allow you to promote your services among softphone users.
